

# TOCL

TRANSLATION OF CULTURAL LANGUAGE

## ABOUT THE PROJECT

### WHAT?

Cultural education plays a paramount role in migrant social inclusion. It helps to fight the marginalization of migrants while also enabling them to understand better the culture of the society they are now living in. Project *TOCL - Translation of Cultural Language* has recognized the need to educate migrant communities on the specifics of cultural elements of the hosting countries and regions through language learning.

### HOW?

The *Translating Culture* method is an innovative approach to educating migrants in host countries on cultural matters. The goal is to develop a training curriculum to be used by language professionals and migrants. The curriculum will include cultural material (stories, songs, recipes, jokes, proverbs) from the consortium countries, translated to English, French and Arabic.

### WHERE?

The main output of project TOCL is an interactive e-learning platform that will work as a training environment and include the TOCL curriculum the translated cultural material. This open-source platform will be free to use by professionals and migrants across the EU, who would like to assess their level of language knowledge and further their educational path.
